**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10 and 38-40, drawn to changing service profile, classified in class 379, subclass 201.02.
  - II. Claims 11-18, drawn to data processing for modifying data records, classified in class 705, subclass 3.
  - III. Claims 19-24, drawn to remote ordering, classified in class 705, subclass 26.
  - IV. Claims 25-30, drawn to prepaid debit relating to Call Detail Record, classified in class 379, subclass 114.2.
  - V. Claims 31-37 and 41-50, drawn to ordering merchandise, classified in class 379, subclass 93.12.
  - VI. Claims 51-57, drawn to accounting method, classified in class 705, subclass 30.
  - VII. Claims 58-68, drawn to presentation or description of sales item, classified in class 705, subclass 27.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I - VII are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2)

Art Unit: 2643

that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because they are each directed to different inventive concepts. The subcombination has separate utility such as invention I directed to changing service profile, invention II directed towards modifying data records, invention III directed towards remote ordering, invention IV directed towards prepaid debit account relating to CDR, invention V directed towards ordering merchandise, invention VI directed towards data processing for accounting, invention VII directed towards presenting or description of sales item.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
